eMenu Order App

User interface & Prototyping

Project Summary

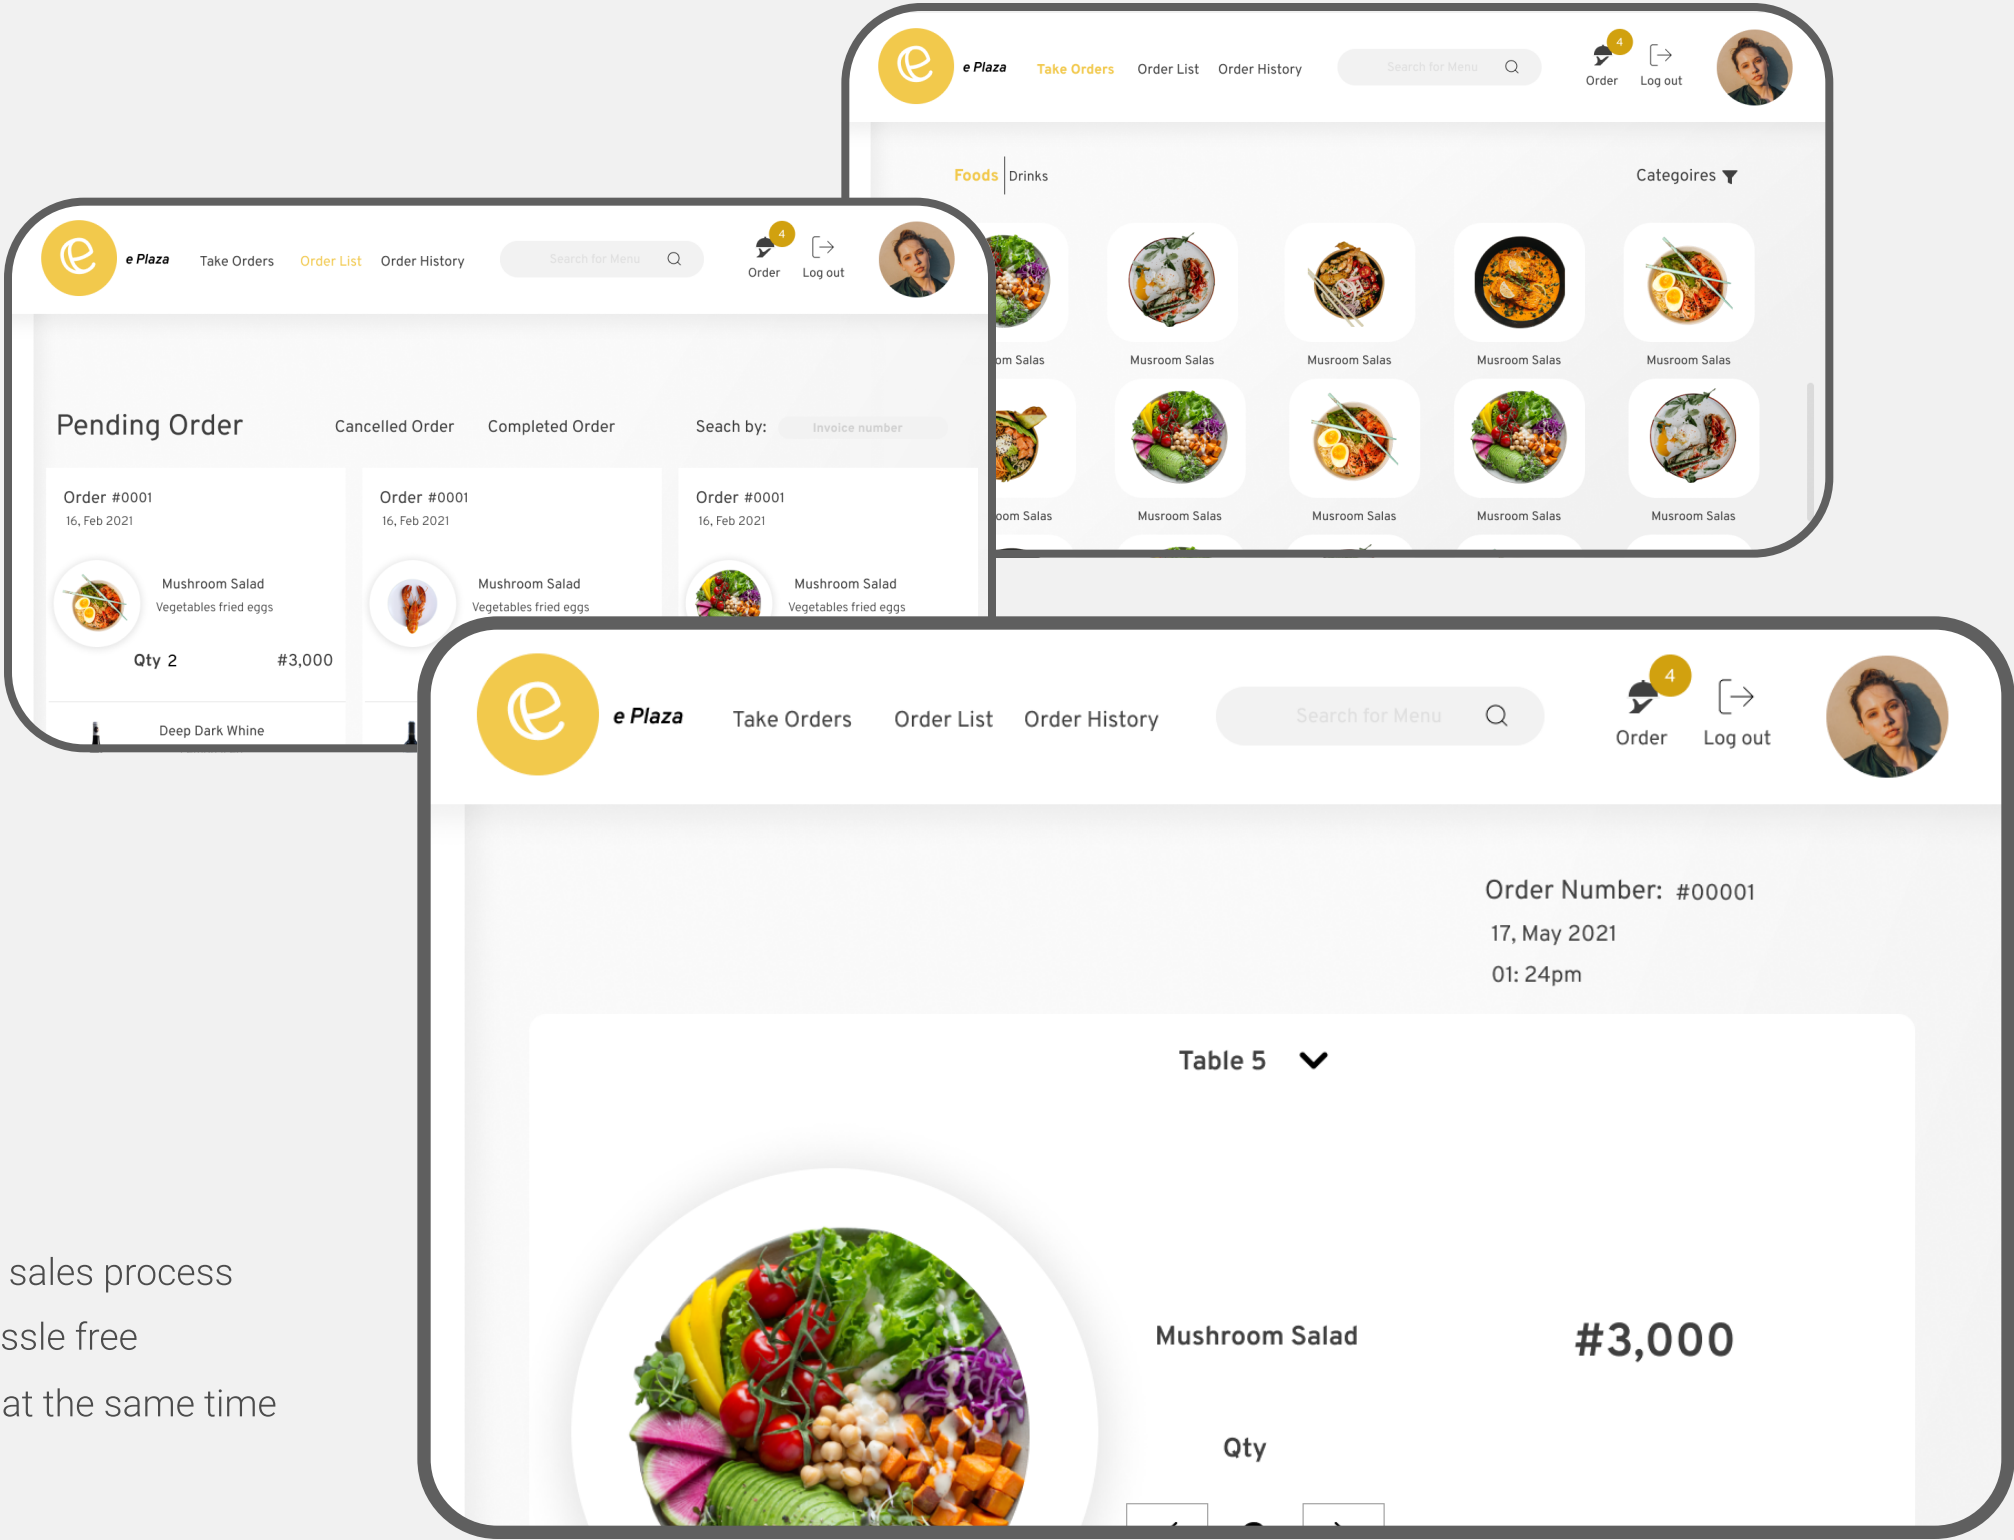

This app is bulit to replace the tradtional way (Pen & note) of taking orders in eminent restuarants. The smart tab is an eMENU (Electronic menu) system used by proffessional waiters to take down orders and print receipts for customers. The eMENU app is built with the aim of transforming Menu order experiences and bolstering order values.

Roles

User interface & Interactions
User experiance research

Scope

To fasten the workflow of resturant sales process
